Art gallery exhibit: *The Art of Upcycling*

Water main flushing

Water main flushing is one of the ways the City maintains our clean drinking water. When work is happening in your neighbourhood, you may notice a temporary drop in water pressure, sediment or a discolouration in your water. The water is still safe to drink, but to correct problems with cloudy water, run your cold water for a few minutes until the water runs clear. Learn more at pittmeadows.ca/water.
