Winter Driving: Take it slow in ice and snow!

PREPARE FOR SNOW

Driving in winter conditions can be challenging. It's important to be prepared. Here are some helpful tips to keep you and your loved ones safer on the road:

- Along with slowing down, it's important to have good winter tires and check them regularly as low temperatures can reduce tire pressure. Tires marked with a mountain/ snowflake symbol offer the best traction on snow and ice and in cold weather.
- Know before you go. Before you head out, check road conditions on the radio or visit **DriveBC.ca**
- Remember to clear snow and ice from windows, lights, mirrors, hood and the roof before you drive.
- Don't let a thief take off in your warm car - always stay close by while it's warming up.
- When approaching highway maintenance vehicles like snow plows, salt/sand trucks, leave plenty of space and pay attention to signage.
- Slippery road = longer stopping time. Maintain a safe following distance of at least 4 seconds between you and other vehicles. To prevent skidding, avoid sudden movements by accelerating and braking slowly
